SUMMARY

Mid-level Frontend Developer with strong experience building **modern, scalable, and performance-focused web applications** using **Next.js, React, TypeScript, and Tailwind CSS**. Proven ability to translate designs into clean, reusable components while prioritizing **user experience, accessibility, and maintainable code**. Experienced in freelancing and collaborative team environments, with a strong foundation in modern frontend workflows and cloud-ready applications. Actively seeking **remote frontend roles and freelance opportunities**.

TECHNICAL SKILLS

Frontend

- HTML5, CSS3, JavaScript (ES6+), TypeScript
- Responsive & mobile-first design
- Component-based architecture

Frameworks & Libraries

- React
- Next.js
- Tailwind CSS

Tools & Workflow

- Git & GitHub
- npm
- VS Code
- Chrome DevTools

APIs & Integrations

- REST APIs
- Paystack API (Payments)

PROJECT EXPERIENCE

1. MimiStore – E-commerce Web Application

Tech Stack: Next.js, TypeScript, Tailwind CSS, Node.js, Paystack API

Description:

Built a modern e-commerce web application focused on **performance, scalability, and user experience**. Implemented product listings, checkout flow, and payment integration using Paystack. Optimized UI components for responsiveness and fast page loads.

Key Contributions:

- Developed reusable UI components with Tailwind CSS
- Implemented clean routing and state management
- Focused on performance and accessibility best practices

2. Afri-Hope Foundation – NGO Website

 <https://afrihope-foundation.vercel.app/>

Tech Stack: Next.js, TypeScript, Tailwind CSS

Description:

Developed a production-ready NGO website designed to **build trust, emotional connection, and credibility** for an international non-profit organization operating across Africa.

Key Contributions:

- Built responsive layouts optimized for all devices
- Implemented SEO-friendly pages and performance optimization
- Created clean, maintainable components aligned with branding goals

3. StayFinder – Home Listing Web Application

 <https://stayfinder-listening.vercel.app/>

Tech Stack: Next.js, TypeScript, Tailwind CSS

Description:

A modern property listing platform leveraging APIs for **dynamic rendering of listings, images, and metadata**, with a focus on scalability and type safety.

Key Contributions:

- Integrated external APIs for dynamic data rendering
- Ensured strong type safety using TypeScript
- Built performant UI components optimized for scalability

WORK EXPERIENCE

Frontend Developer (Freelance & Volunteer)

FullstackEdge Agency — *Remote*

Duration: 2 months

Responsibilities:

- Collaborated with designers and developers on **agency and e-commerce websites**
- Built responsive frontend components using modern frameworks
- Assisted in implementing UI features and improving user experience
- Worked in a team environment using GitHub for version control

EDUCATION

Higher National Diploma (HND)

CERTIFICATIONS

- ALX Professional Foundation Course
- ALX AICE
- ALX Frontend Development (Basic & Pro)
- AWS Cloud Practitioner
- AWS Solutions Architect (Foundational Knowledge)
- Google Digital Marketing & E-commerce

CORE STRENGTHS

- Clean, reusable, and maintainable frontend code
- Strong focus on performance, accessibility, and UX
- Ability to work independently and in collaborative teams
- Fast learner with a growth mindset

AVAILABILITY

- Open to **remote roles (local & international)**
- Open to **freelance and contract work**
- Highly motivated to learn and grow on the job
